About

- I have been working as a full-stack developer for more than 3 years.
- I build user-focused interfaces and admin panels with Vue and Inertia.js.
- I have experience in RESTful API design and in background processing with queues and scheduled jobs.
- I use MySQL and PostgreSQL for relational databases, and Redis and Meilisearch for caching and search.
- I also handle the infrastructure side, from setting up Linux servers to deploying with Docker and keeping backups.
- With advanced English, I work comfortably with technical documentation and resources.

Skills

Backend: PHP, Laravel, Filament, Livewire, REST API, queues and scheduled jobs, WebSocket, Python (basic)

Frontend: Vue, Inertia.js, TypeScript, JavaScript, Tailwind CSS, Alpine.js, Bootstrap, HTML, CSS

Authentication and security: OAuth, roles and permissions, two-factor authentication, API token authentication

Databases and search: MySQL, PostgreSQL, Redis, Meilisearch

Infrastructure: Docker, Nginx, Caddy, Apache, Linux (Ubuntu), Cloudflare, SSL, Restic

Tools and testing: Git, GitHub, GitHub Actions, Composer, Pest, PHPUnit, PHPStan, Claude Code, GitHub Copilot

Experience

PHP Developer

05/2024 – Present

Atlasfor Dijital Teknolojiler ve İnovasyon A.Ş. (digital services) · Ata Teknik Endüstriyel Teknolojiler (hardware and industrial products) · İstanbul, Türkiye · Full-time · Remote

Transferred in 09/2026 to Atlasfor, a company under the same ownership.

- Built and maintained the backend, frontend and database of projects including a 14-language e-commerce system, 3 B2B projects and a CRM
- Cut product search time from about 10 seconds to 1 second with Meilisearch
- Third-party integrations with shipping carriers, virtual POS and payment systems
- Theme integrations, UI adaptations, bug fixes, security and performance improvements
- Server setup, configuration and management
- AI-assisted development with Claude Code and GitHub Copilot, Git-based team workflow and code reviews

Web Developer

09/2023 – 05/2024

Freelance

Worked on theme integration, bug fixes, new features, security and performance improvements, API integrations, SSL/HTTPS configuration and server management on new and existing projects.

Various roles in education and translation · English teaching, translation, teaching Turkish to foreigners

2019 – 2023

Projects

Paratiq · Laravel, Filament, Livewire

paratiq.app

github.com/metinbolat/finance-budget-tracking · the public repository is an early version, the current version is in a private repository.

In this personal finance web app, I used UTC-based date and time handling so that users see their data in their own time zone. I put localization first, with multi-language support and currency, number and date formats. I also added security features such as 2FA and comprehensive session management.

Kolekto · Laravel, Vue, Inertia

kolekto.online

A shopping board that collects products from different sites, with their prices and notes, into each user's own boards.

Formal Ajans · Laravel, Filament

formalajans.com

A digital agency website with its admin panel: a lead form, bulk email campaigns across several providers and Google Drive integration.

Digital Reconciliation Platform · PHP, Bootstrap, JavaScript, MySQL

A platform I helped a client build that lets accounting firms manage financial reconciliation digitally. Excel data can be uploaded and analyzed, access is protected with token-based security, and it includes automatic PDF reports and email notifications.

CRM · Laravel, Vue, Inertia

A customer relationship management app with real-time updates and record search from a command menu.

B2B Panel · Laravel, Vue, Inertia

A B2B ordering panel for business customers, with virtual POS payment integrations.

Order and Service Tracker · Laravel, Vue, Inertia

An app that local businesses in different sectors install on their own server. It tracks the stage of each order and service.

Digital Restaurant Menu · Laravel, Filament, Vue, Inertia

A digital menu that guests open with a QR code, and the admin panel restaurants use to update it.

Education

Computer Programming (Associate Degree)

10/2024 - 01/2026

Anadolu University, Open Education Faculty · Graduated

English Language and Literature (BA)

09/2014 - 06/2019

Kocaeli University, Faculty of Arts and Sciences · Evening program

Languages

Turkish (native) · English (advanced) · German (beginner) · Italian (beginner)
